Professional Summary

Senior Product Manager with 5+ years of product management experience and 10+ years across engineering, operations, and technology. Specialized in building data platforms, AI-enabled internal products, and operational systems that improve business decision-making through automation, analytics, and scalable platform capabilities. Experienced leading cross-functional initiatives across Engineering, Data, Pricing, and Operations in aviation, logistics, and travel technology.

Professional Experience

Product Manager

Traveloka | Dec 2024 – Present | Jakarta, Indonesia

Traveloka is one of Southeast Asia's leading travel technology companies serving millions of users across accommodation, flights, and experiences.

- **Generated approximately USD 1.03M in incremental accommodation revenue** by expanding competitor data coverage and improving the quality of pricing intelligence consumed by Traveloka's pricing platform.
- **Owned the product roadmap** for Competitive Intelligence platform capabilities supporting Pricing through data acquisition, monitoring, platform standardization, and workflow automation.
- **Designed and built Dobby**, an AI-powered operational assistant integrating Claude, BigQuery, Tableau, and Datadog to automate reporting, incident investigation, and self-service analytics.
- **Reduced operational incident investigation time from 20 minutes to under 2 minutes** by automating alert diagnosis and integrating monitoring workflows with Datadog.
- **Led the standardization of internal data platform interfaces**, simplifying integrations across multiple competitor data sources while reducing downstream operational complexity for Pricing and Engineering teams.
- **Improved data quality** by enhancing automapper logic, reducing mapping errors to below **5%** across **33,000+ weekly entities** while automating vendor health monitoring.
- **Partnered with Engineering, Pricing, Data, and Operations teams** to prioritize platform capabilities, balancing technical constraints with measurable business outcomes.

Platform Excellence Lead

ASTRO | Jul 2024 – Dec 2024 | Jakarta, Indonesia

Astro is an Indonesian quick-commerce platform focused on ultra-fast grocery delivery.

- Led platform initiatives focused on operational analytics, forecasting automation, and platform performance monitoring.
- Developed **Search Guidelines** that improved add-to-cart performance by optimizing search relevance, category discovery, and keyword ranking.

Product Manager Lead

Anteraja | Sep 2021 – Jul 2024 | Jakarta, Indonesia

Anteraja is one of Indonesia's leading logistics companies providing instant, same-day, frozen, and cargo delivery services.

- Designed and launched an automated Volume Forecast System by engineering a standardisation layer for unstandardised customer inputs, reducing forecasting cycles from **4–5 days to 1 day**.
- Recovered 80% of sales team forecasting time, equivalent to **~\$9,400 USD annually** in productivity, allowing teams to redirect focus toward customer acquisition and account management.
- Managed end-to-end product logistics across cargo, frozen, and instant delivery verticals, defining north star metrics, system flows, and operational KPIs across regions.

Planning and Engineering Manager

GMF AeroAsia | Dec 2015 – Aug 2021 | Jakarta, Indonesia

GMF AeroAsia is Garuda Indonesia's aircraft Maintenance, Repair & Overhaul (MRO) provider serving domestic and international airlines.

- Managed planning and engineering activities for aircraft structural maintenance projects, leading **22 engineers** and **30 operational support staff**.
- Coordinated cross-functional engineering teams to ensure safe, timely, and efficient aircraft maintenance execution.

Education

Institut Teknologi Bandung (ITB) | Bandung, Indonesia

Bachelor of Engineering in Materials Engineering | 2011 – 2015
